Paul Geană
Frontend Developer

About

Hello, my name is Paul and I am a self-taught frontend developer. In the last year I have learned technologies such as HTML, CSS, JS, Bootstrap, Vue.Js, all of which I know at a basic level. During these years I also learned about UI/UX Design, also knowing technologies such as Figma and Adobe Illustrator.
I am an open-minded person, motivated to learn more and more.

Education

I finished a high school with a vocational profile at the end of which I obtained the baccalaureate diploma. On the frontend development side, I followed both paid and free courses, and on the UI/UX Design side, I followed Google's UI/UX courses.

Technical skills

| HTML | CSS | Java Script |

| Bootstrap | Vue.Js |

| Adobe Illustrator | Figma |

Personal skills

- Disciplined
- Oriented towards both technical and visual work
- Friendly and communicative
- Problem solveing
- Attentive to detailsz

Working experience

I worked on the project portfolio and on my knowledge for more than a year, which is why I think I can say that I have more or less a year of experience.
